web: [www.simtrak.com](http://www.simtrak.com)

AS LOW AS  
**\$20 PER MONTH**

For a single user version used at most high schools, minor league pro teams, and one or two person collegiate sports medicine departments, the purchase is \$600 the first year, and annual renewal is \$150 per year thereafter for updates and support. Over 5 years, that equals \$20 per month.

Simtrak™ Mobility software is used by **popular demand** in some of the most demanding sports medicine documentation settings you will find. When athlete health records are really important, it is time for Simtrak™.

## Value That is Unsurpassed

Where the sports medicine staff is one or two persons, the cost is often only **\$600 plus \$150** each year for renewal (updates and support). That averages to only **\$20 per month**, over 5 years. *For larger athletic training staffs, the cost for multi-user Simtrak™ Mobility is \$1500, and then \$375 per year thereafter. For the full Premier Synchronizer version, used at the university level and in major professional sport leagues, the price is \$3000 plus \$750 annual ongoing. There is no limit to the number of users for these two versions. There is no extra charge for extra users.*

## Easy To Use and Excellent Support

The software is designed with **user friendliness** in mind. A familiar-looking and modern set of **Toolbars** is at the heart of the software operation. Your selections of task forms and locations for data are offered via a well coordinated **tab layout**. A wide variety of **Help Guide pdf documents** is available online at the Simtrak™ web site (<http://www.simtrak.com>). These Help Guides comprise the detailed user manual, readily available at all times, well organized, and comprehensive in the descriptions you will want when learning new features. When that is not enough, email and telephone support is always at your fingertips.

## Data Security and Compliance Options

With Simtrak™ Mobility, you keep **total control** of your data, and you keep it as secure and private as you like. Whether you install the software on your organization's **secure network**, on a single stand-alone **work-station for physical control and access limitation**, on a **laptop with protection** features, or on (pre-installed) a **USB flash drive with encryption** services, you can know where your data is and confidently limit who can get to it. Such ultimate control enables a full range of options for you when it comes to compliance with regulations and policies you may encounter, and those options provide you the foundation for the simplest and least cost ways of addressing compliance issues.

## Mobility – Take Athlete/Team Files With You When Traveling

Simtrak™ Mobility X incorporates a **new feature** – player and team **check-out** (*feature available only in the Premier Synchronizer version*). This feature permits taking a selection of player files out of the main installation of the software, taking it along while traveling with a player set or team, making any entries or changes while traveling, and then “checking the data back in” upon returning from the trip. All records in the main installation are then updated with any changes or entries that were made while traveling.

## Ease of Use

Excellent ONLINE documentation.

Full set of Help Guides.

## Data Security

Keep control of your data.

On your own network, stand-alone computer, laptop, or encrypted USB flash drive.

## File Mobility for Travel

Player or team “check out” feature for taking data with you for away games.

## Customizable

Create your own pull-down choices for 26 different pull-down fields.

## A Template For Best Practices Record Keeping

Built on years of input from dozens of head athletic trainers, the software guides you in performing the best accepted sports medicine documentation practices, proven repeatedly in athletic dept. offices, client meeting rooms, and courts.

**[www.simtrak.com](http://www.simtrak.com)**

Simtrak™ Mobility software is a product of Premier Software, Inc., a long-established software developer with top level world-class expertise in data base design, management, and operation. The company's background spans the world of data display and management roles from accounting systems, to air transportation scheduling, to nuclear energy plant welding software, and includes sports medicine and both professional and amateur scouting systems in sports. The business hallmark is software that is highly professional in design, extremely compact and efficient in structure, very fast in processing, and bug free in reliability. As a business highly regarded for trust and performance, Premier Software, Inc., seeks and retains clients for long-term relationships.

# A SOFTWARE THAT FITS YOUR NEEDS AND PROTECTS YOUR INTERESTS

## Customize Your Software To Fit Your Operation's Terminology

Simtrak™ Mobility is an especially customizable documentation system for your sports medicine files. You can **create your own pull-down choices** for data entry for **26 different pull-down fields** *shown below*). Enter **as many choices for each as you like**; there is no limit.

<i>Active Treatment</i>	<i>Injury</i>	<i>Physical Description</i>	<i>Surface Condition</i>
<i>Activity</i>	<i>Injury Type</i>	<i>Physical Physician</i>	<i>Surface Type</i>
<i>Body Part</i>	<i>Location</i>	<i>Position</i>	<i>Time of Injury</i>
<i>Color of Fluid</i>	<i>Medication</i>	<i>Report Status</i>	<i>Type of Test</i>
<i>Facility Type</i>	<i>Non-Active Treatment</i>	<i>Severity</i>	<i>Weather</i>
<i>Functional Activity</i>	<i>Opponent</i>	<i>Specialty</i>	
<i>Game, Practice, or Where</i>	<i>Personnel Type</i>	<i>Sport</i>	

## Provides You A Template For Accepted Best Practices Record Keeping

Simtrak™ Mobility methods, features, and data structures have benefited from **years of input from head athletic trainers and leading sports physiotherapists** and their experiences. The software guides you to maintain your records in a manner and to a level that is a **best practices standard** for digital records in the field of athletic training and sport physiotherapy. In addition to achieving an overwhelming respect and decision-making stature in coaches offices, athletic administration meeting rooms, general manager suites, and athlete family homes, the software's reports repeatedly have proven to be definitive in **research, business transactions, arbitrations, and legal matters**.

## Producing Reports for You, for Physicians, for Management, for Athletes

Simtrak™ Mobility comes with a variety of **pre-designed reports** you can use immediately. They are listed below. In addition, you can create a wide range of **customized reports**.

### Individual Function Reports

**Facility Transactions** - Listing of all services referred to a particular facility. Printed from Maintain/Facilities.

**Group Weight** - All weights or body fat percentages from a team weigh-in. Printed from Transactions/Group Weigh In.

**Image** - Printing of an attached image. Printed from the image viewer screen.

**Initial Report of Injury** - Injury report, services, dictation, and SOAP Notes. Printed from the Initial Report of Injury. Can also print related progress reports and/or related treatments.

**Maintain Costs** - Listing of modalities and their related material and/or labor cost. Printed from Maintain/Costs.

**Individual Personnel** - Personal information, personal/medical information, personal history. Printed from Maintain/Personnel.

**Physical** - Physical results, physical notes, physical dictation. Printed from the physical.

**Progress Report** - Progress report, services, dictation, and SOAP Notes. Printed from the Progress Report.

**Pull Down** - Listing of all answers for a particular pull-down. Printed from Maintain/Pull-Downs.

### Reports from Reports Menu

**Costs** - Material and labor costs accumulated from ATC treatments.

**Facility List** - Listing of facilities.

**Group Print Personnel/Physical** - Print personnel and/or physical information for a group of personnel.

**History** - All transactions for a particular personnel by season or date range.

**Injury Status** - Report of injuries in summary format with totals for days/games missed.

**Injury/Treatment Status** - Report of injuries in summary format with last linked treatment report status.

**Injury Summary** - Report of injuries in detail format with totals for days/games missed.

**Medication** - Report of medications dispensed.

**Paperwork Status** - Report of personnel that have not turned in paperwork or paperwork has expired.

**Personnel Address** - Listing of personnel with address and contact information.

**Personnel List** - Listing of personnel, either in roster format or status format.

**Physician Referral** - Individual physician referral of patient information and/or ATC/Physio referral.

**Physical Expiration** - Report of personnel that have expired physical related tests.

**Program Daily Individual** - Individual listing of each personnel exercise program for a particular day.

**Program Monthly Individual** - Report by month of all exercise programs for an individual.

**Program Monthly Team** - Report by month of all exercise programs for a team.

**Schedule List** - Listing of schedule by season and sport.

**Treatment Management Summary 1 Line** - Report 1 line of treatments, can be color coded.

**Treatment Management Summary 2 Line** - Report 2 lines of treatments, can be color coded.

**Treatment Management Detail** - Report detail of treatments, can be color coded.

**Treatment ATC/Physio Detail** - Full ATC/Physio detail report of treatments with all data, can be color coded.

**Weight Detail** - Listing of all weights or body fat percentages for an individual personnel.

**Weight Summary** - Listing of current weigh-in and prior weigh-in, both weight and body fat percentage, with change from current weigh-in compared to prior weigh-in.

**Weight Yearly** - Spreadsheet of all personnel with all season weigh-in, either weight and/or body fat percentage. Also shows season average and change from last weigh-in to first weigh-in.

For all of the above reports you can 1) preview to screen, 2) print to printer, or 3) generate a file in the following formats: pdf, doc, rtf, xls, htm, txt, tif. And, for members of larger organizations who want to design specialized reports that are unique to their operations, the Simtrak™ ReportWriter module can be purchased. The Simtrak™ ReportWriter enables the user to develop an unlimited number of reports, using all of the more than 400 data fields in the Simtrak™ Mobility product.

**PROTECT YOUR  
INFORMATION**

**Use the built-in  
Simtrak™ Mobility  
Back-Up Utility  
to protect your  
information from  
loss.**
